

The Accellos One Warehouse Management Solution (formerly Radio Beacon WMS) delivers a powerful, scalable and flexible real-time system that

helps you boost productivity, reduce costs, shorten order fulfillment times and increase customer satisfaction.

The Accellos One Warehouse suite consists of 3 products, *Collect*, *Manage*, and *Fulfill*. (see reverse for details)

The Accellos One family of products are built on the Microsoft .NET platform and employ an SQL database search engine. This standards-based architecture makes this product especially attractive to small and mid-size companies. It is compatible with most ERP and ac-

counting systems. The Accellos One WMS works as part of a complete operational solution by integrating seamlessly with:

- ✦ Barcode hand held units
- ✦ RFID
- ✦ Accounting software
- ✦ Shipping systems
- ✦ Warehouse automation equipment
- ✦ Material handling technology
